

Proving the Earth is not Flat

This is the first in a series of videos that show how anyone can prove to themselves that the earth is not flat. It is a spherical spinning ball. In this segment, I discuss how flat earthers are confused about the horizon, and I demonstrate how the horizon perfectly fits the globe earth model, and shows the curve of the earth when you know what to look for. Why don't the clouds move? They do. At this scale, the clouds you see are REALLY BIG, and move very SLOWLY in comparison to the size of the whole earth. But you can see that the clouds do move in these magnified and stabilized animations made from the same images. <https://svs.gsfc.nasa.gov/2971>

[Proving the Earth is not Flat – Part 1 – The Horizon](#)

This is the first in a series of videos that show how anyone can prove to themselves that the earth is not flat. It is a spherical spinning ball. In this segment, I discuss how flat earthers are confused about the horizon, and I demonstrate how the horizon perfectly fits the globe earth model, and shows the curve of the earth when you know what to look for.

In this part, I explain how our view of the stars is perfectly explained by the heliocentric globe model, and how all flat earth models fail to fit what we see. We see different stars in the Northern and Southern hemispheres, and they rotate around two points each night, called the north and south celestial poles, and they rotate in opposite directions.

In this part in the series, I explain how our observations of the moon demonstrate the shape and nature of the spherical earth. Rapper B.o.B. wants to try to prove the earth is flat. Like all flat earthers, he is simply ignorant of many of the facts that easily debunk flat earth claims. He is not “WOKE” to a hidden truth. He is just very confused about science.

[Proving the Earth is not Flat – Part 2 – The Stars](#)

In this part, I explain how our view of the stars is perfectly explained by the heliocentric globe model, and how all flat earth models fail to fit what we see. We see different stars in the Northern and Southern hemispheres, and they rotate around two points each night, called the north and south celestial poles, and they rotate in opposite directions.

In this part, I explain how our view of the stars is perfectly explained by the heliocentric globe model, and how all flat earth models fail to fit what we see. We see different stars in the Northern and Southern hemispheres, and they rotate around two points each night, called the north and south celestial poles, and they rotate in opposite directions.

[Proving the Earth is not Flat – Part 3 – The Moon](#)

In this part in the series, I explain how our observations of the moon demonstrate the shape and nature of the spherical earth. Rapper B.o.B. wants to try to prove the earth is flat.

Like all flat earthers, he is simply ignorant of many of the facts that easily debunk flat earth claims. He is not "WOKE" to a hidden truth.

In this segment, I explain two easy experiments anyone can do, that proves the spherical earth, and absolutely destroys any flat earth model. Do the experiments for yourself, honestly and carefully, and try to make your results fit the flat earth model.

[Proving the Earth is not Flat – Part 4 – Easy Experiments](#)

In this segment, I explain two easy experiments anyone can do, that proves the spherical earth, and absolutely destroys any flat earth model. Do the experiments for yourself, honestly and carefully, and try to make your results fit the flat earth model.
